### Why Reliable Power Matters for Modern Musicians

Ever been mid-performance when your pedalboard suddenly died? You're not alone. A 2023 survey by Music Tech Magazine found 68% of touring musicians experience power-related failures annually. The Cioks SOL power supply enters this drama as what some call a "roadie in a box"--but is it really that simple?

Let's break it down. Traditional adapters often create noise interference, especially when daisy-chaining pedals. Last summer at Hamburg's Reeperbahn Festival, three headline acts faced hum issues traced to cheap power units. That's where Cioks' patented ripple suppression--rated at
